

1) 

**290g**

**1kg 580g**

**4kg 110g**

2) *an apple*

1) *a melon and a banana*  
*an apple and an apricot or a peach and a strawberry*  
*an apple, a strawberry and two blueberries or three apricots and a strawberry*

2) *an apple, a strawberry and two blueberries or three apricots and a strawberry*

3) *Julia is correct. In order to have a mass greater than 2kg, one piece of fruit must be a melon. There is no piece of fruit with a mass of 500g so it is not possible to have two pieces of fruit with a mass of 2kg 500g.*

1) *Accept any correct combinations, such as banana and apricot (150g + 30g) and strawberry and apple (15 × 10g + 30g).*
